

ACTIVIDA 6 FORMA GREETING Y TABLA DE MULTIPLICAR

The image shows a screenshot of the Visual Studio Code editor. The main editor window displays a PHP file named 'tabla_multiplicar.php'. The code is as follows:

```
1 <?php: html>
2 <html lang="es">
3 <head>
4     <meta charset="UTF-8">
5     <meta http-equiv="X-UA-Compatible" content="IE=edge">
6     <meta name="viewport" content="width=device-width, initial-scale=1.0">
7     <title>Document</title>
8     <link rel="stylesheet" href="style.css">
9 </head>
10 <body>
11 <div>
12 <h1>
13 $multiplicando;
14 $multiplicador;
15
16 echo "<table test-align:center; border=5>";
17 echo "<tr>";
18 for ($tabla=1; $tabla<=10 ; $tabla++) {
19     echo "<td>Tabla del $tabla </td>";
20 }
21 echo "</tr>";
22 echo "<tr>";
23 for ($multiplicador=1; $multiplicador <=10 ; $multiplicador++) {
24     for ($multiplicando=0; $multiplicando <=10 ; $multiplicando++) {
25         echo "<td>$multiplicando X $multiplicador ->";
26         echo ($multiplicando * $multiplicador);
27         echo "</td>";
28     }
29     echo "</tr>";
30 }
31 echo "</table>";
32 };
```

The code is a PHP script that generates an HTML document. It includes a basic HTML structure with a head section containing meta tags for charset, compatibility, and viewport, and a title. The body section contains a table. The table has a single row with 10 columns, each containing the text 'Tabla del \$tabla'. The table is styled with a border of 5 and is centered. The script uses PHP's echo function to output the HTML code.

Visual Studio Code interface showing a file explorer on the left with the project structure:

- EXPLORADOR
 - TABLADEMULTIPLICAR.PHP
 - style.css
 - tablas_multiplicar.php

The main editor displays the `style.css` file with the following content:

```
1 body {  
2   background-color: #rgb(255, 119, 74);  
3 }
```

The status bar at the bottom indicates the file is at line 2, column 23, with a length of 4 characters. The system tray shows the date and time as 07:53 p.m. on 14/11/2022.
